SACRED CONCERTS.—The Choir of St. Paul's
Church, (Universalist) Bev. Mr. King, Paster, an
nounce a forthcoming series of Sacred Concerts at
their Church on alternate Thursday evenings, programmes to comprise selections from the Oratories, Masses, and other sacred compositions of the
great writers of ancient and modern times. The
choir is composed of well known and popular resident innections, and those concerts cannot be othcruse than pleasing and instructive.

The ser rice is to commence on Thursday evening
of the present week.

Anner or a Hosse Tuny.—On Friday last, Capt. Pollock, of Galesburg, arrested a man named Bennett, at that place, who had atolen a horse, buggy and harness, in this city. He arrested thin on mere description. The horse was sold to a farmer in McHenry Co., by Bennett, who, after the trade, stole a still hetter horse from the farmer, and made off. Bennett is the son of wealthy purents in New York city.

FIRST ARRIVAL BY THE NEW OVERLAND

Sr. Louis, Oct. 10.—The overland California mail arrived at 9 o'clock last night. A large number of prominent citizens assembled at the Pactific Railroad depot on the arrival of the train from Jefferson City.

Mr. Butterfield was greeted with a hearty welcome from the crowd, and was formally received with a brief complimentary speech by John F. Parley, on behalf of the citizens. Mr. Butterfield responded in an appropriate manner, returning his warmest thanks for the unexpected demonstration and cordial approval of his labors by the psofile of St. Louis.

The mails were then escorted to the Post Office by a long procession of people with bands of music.

The Alla California of the 14th, prepared extended.

News from Frazer River unimportant. Water still too high for successful mining. Business at Victoria much depressed.
Oregon dates are to the 5th of September. Major Barrett had a kirmath with the Indians on O'Kanagon. Lieut, Allen and six Indians were killed. A party of miners mader Major Bobinson was attacked by Indians on the Washatch, and one white mas killed.
A rumor obtained credit at the Dalles that General Falmer's party was massacred near O'Kanagon. Good digzings had been found on Washatch.

The numberless corruptions and abuses which it has introduced into our political affairs, the power which it has given Catholicism in the affairs of State, and above all the efforts which it has made and is now making for the extinguishment of that principle of liberty which is the foundation stone of our Government and Religion, have proceeded far enough. It is time that the incestuous union was dissolved. The fate of Hungary and Austria teach a lesson too impressive to be forgotten.

wide the difference. Clay and Lincoln sustain the declaration that "all men are created equal." Doughas limits it to those white
people only who inhabited the thirteen colonies in 1776—that they were endowed with the
same rights which at that time were guaranteed
to diritish subjects in Great Britain. In the
one case the doctrine is recognized as a great
and indestructible principle—true in every
age and every nation. In the other it is reduced from the grand proportions of a fundamental truth down to the pairty catch-word
of a political canvass. Who is right—Clay

[Prom the Knoxville (Tenn.) Whig.]
Mr. Pryne is staying at the same hotel I do
the American. He is a small, heavy-built
man, about 36 years of age, and wears a ruffian-like pair of whiskers. He is not a pretiy
speaker, by any means, and has rather a feeble voice, which he strains very much in
speaking. His gestares are awkward, rapid
and violent, and are alike in seuson and out
of season, agreeing exactly with the applause
of the negroes and willer ruffians who clap for
hirr. He is a man of only moderate talents,
and ordinary lecraing. He is bitter, unscrupulous and unmitigated in his abuse of the
South, and is familiar with the slang dictionary
of abolitionism. He has been in my room
frequently, but I have never been in his. He
is a kind of man who will bard in the upper
story of a botel, and do without gas light
where board is cheap. He makes the acquaintance of free negroes and low down abolitionists, with great facility; and I as often
see him in conversation with negroes as white

Mr. Ropton: The above portrait of myself must be amusing to my acquaintances n your region, and as they might be equally

in your region, and as they might be equally amused by a portrait of the Parson, I will draw one.

He is six feet high, of dark, sallow complexion, angular in his buildt and motion, (what we Yankees call a raw-boned man, answers well his description, especially the "raw" part of the picture; ) he has a long neck, surmounted by a small head for a man of his size; this eyes are black, but not peen liarly keen; his mouth indicates a mulish fit.nness; his under lip is too large for its place, and has to be shirred in order to fit; his hands are large, his gait slovenly, and his air and manner that of ore of the "bhoys." I cannot judge of his style of oratory, for he was consensually unwell, and Gen. Small, who is much of a gentleman, read for him.

I did all the builness with the janitor of the ball, the printers, (whom the parson denounced roundly, because they would not do our elvertis ag for nothing,) the bill-posters and door-keepers, in order to give the parson time to write part of his speeches; and I was therefore compelled to make several calls at his roof, as I sas as it he room of the hill-poster, and a respectable old colored man who earned bills for us, and I found them both much better behaved than the parson. I hourded at the same ho all with him, but never saw him at the table but once. Whether he took his meals at a chill'ag entinghouse and boarded at the "american," I do not know. My room war just one floor below his, and he the gue wang of the hotel. He hurried boms under the presence that his child was sick. I presume it got better as soon as the parson got out of a Free State.

The Csar has conferred the title of "Count Amoorski" upon General Mouravieff. The rescript ascribes the honor to the General's share in the negotiation of the late Chinese treaty; and to his efforts for the "civil regeneration of Siberia." The ground was probably yet broader.

—A copy of the French treaty with China has just been sent to Rome from Paris, to be handed to the Pope, together with a letter from the Emperor's own hand. The stipulations contained in the treaty in favor of the religion of which the Pope is the chief, form the motive of this proceeding.

—It is reported that on account of the recent treaties, the Amperor of China is to have the grand cordon of St. Vladimir from Russia, and that of the Legion of Honor fron France.

The answer of the risitor, with a mocking langh, wss, "O, it's not much; it's something about the power of team." And so the lady laughed that a san should go mad about so frivolous a thing as that.

NOTHING NEW UNDER THE SUN. GRAY HAIRS FROM Fright.—A very corp-lent lady riding in a carriage near Memphi was overtaken by a severe storm, which thre a tree directly across the carriage, betwee herself and the driver, smashing the vehicl-but not injuring her in the least. The frigh however, caused severe sickness, and turne her hair completely gray. Steam Vessel Built in Spain in 1458! A Steam Vessel Built in Spain in 1453!

Edward Everett, in a speech before the Essex (Mass.) Agricultural Society, said:

In 1453 it appears that such a thing as a steam vessel was known in Spain. This is a fact not widely circulated that the presence of Charles Y. and all his court, in the harbor of Barcelona, a vessel of 200 tons, propelled by an engine, the construction of which was a secret to all but the inventor. The chronicles of that day inform us that there was a great cauldron of boiling water within, and two wheels on the outside which moved the vessel. The treasurer of the kingdom objected to its introduction. It seems to have been quite perfect, since the objections urged against it were that it was too complicated, very expensive, and the boiler apt to explode. But Spain was not ripe for it; the world was not ripe for it. The inventor, diagneted with the want of appreciation displayed by the court, took the engine out of the vessel, allowed the ship to rot in the arsenal, and his secret perished with him in his grave. One century later and the same problem was offered to France. A celebrated female, equally renowned for her beauty, immoralities, misfortunes and longevity also, for she died at the age of 134 years—the famous Marie de 10 reme—so well known to the readers of modern fiction—has furnished us, in a letter te an admirer, written in 1641, these most astonishing details. The celebrated Marquis of Worcester was then on a visit to Madame in Paris, and with her visited a madhouse in the capital. While coursing the court yard of that dismal establishment, the lady was almost paralyzed with terror, and while clinging to her companion she saw a frightful face looking through the bars of a window of a building, and heard these strange words—"I am not mad! 118 South Water at 118 South W man should go mad about so frivolous a thing as that.

This man, it seems, came from Normandy to bring before the king his discovery of the act that steam could be used to navigate the ocean, and in short there was nothing that he odin not claim could be done by the power of steam. Cardi and R'chillien was uppermost then, and though he was most sagacious and ealig htened as worldly wisdom goes, yet he turned his back on the inventor. The man followed him from place to place, and the Cardinal, getting tired of his pertinacity, sent him to the madhouse. The man even wrote a book on the subject of his thoughts, entitled Moving Powers. The Marquis of Worcester was much interested in this book, and used some of its ideas afterward in his own works. So we see that France in 1641, as Spain in 1463, proved her inability to take

ss Spain in 1453, proved her inability to take up and wield this mortal thunderbolt. No, sir, the problem was reserved for the Angle-Saxon race to grapple with and conquer, and thereafter the mechanical skill of England was turned to this invention with various success, till in the middle of the last century, after the idea had been floating for two hundred years in ingenious minds, the steam engine, that scarcely inanimate Titan, that living, burning mechanism, was brought to perfection by James Watt. Thenceforth the engines of labor, marshalled by the power which Watt brought for ward, were to make their bloodless triamph, not for the desiruction, but for the blessing of mankind. Lace Curtains, Crape Shawls and Counter CLEANED, BLEACHED, And warranted to look as good as new. CARPETS, HEARTH RUGS AND DRAUGHTS, Tube Across the Atlantic, Proposed I A writer in the Philadelphia Press, whose mind has been somewhat agitated by the startling inventions of the day, sends to that journal, an article from Mr. Dick's Works on the subject of Acoustic Tunnels, "belleving," he says, "that great improvements can be made in them, especially since the discovery of gutta perchs, and that we may be able, some time or other to talk to John Bull across the Atlantic Ocean." He adds:
"Experiments were made in Paris by M. Blot on the transmission of sound through very long tubes, and through solid bodies. These experiments were made through long or lindrical pipes, which were constructed as conduits for fountains to embellish the city of Paris. With regard to the velocity of sound, Paris. MERCANTILE PIECE GOODS,

Dyed and Re-finished. B.—Gents' Coats, Vests and Pants Cleaned and Related with dispatch. REMOVAL. A. G. BURLEY & CO., These experiments were made through long cylindrical pipes, which were constructed as conduits for fountains to embellish the city of Paris. With regard to the velocity of sound, it was ascertained that its transmission was ten and a half times as quick as through the air. The pipes were over one thousand and thirty-nine yards in length. M. Biot was stationed at one end, and a friend at the other; they heard the lowest voice so perfectly as to hear the words and keep up a conversation on the subject of the experiments. They wished to determine the lowest point at which the human voice seemed to be audible, but could not accomplish it; words spoken as low as when we whisper a secret to another were understood, so that not to be heard there was but one resource—that of mot speaking at all. Between a question and answer, the interval was not greater than that for the transmission of sound. The time in the experiment through one thousand and thirty-nine yards, was about five and a half seconds. A report of a pistol fired at one end occasioned considerable explosion at the other than a pretty sinart blow, and drive light substances out of it to the distance of half a yard, and to extinguish a candle. Don Gantian, another savan, proposed to build horizontal tunnels widening at the remoter extremities, and found, at the distance of nearly a mile, the ticking of a watch could be heard far better than close to the ear. He calculates that a series of such tunnels of number of the pipe would be heard far better than close to the ear. He calculates that a series of such tunnels of number of number of number of number of number of number of such as a series of such tunnels when they will be perfected so as to be used as much for long distances as they are now in many large manufactories, and even between cities; and the day will probably come when they will be perfected so as to be used as much for long distances as they are now in many large manufactories, and cren in dwellings, on a small scale and incover as speaking tub

[Correspondence of the Press and Tribe Johns, October 19
The wet and otherwise unpropitious brought gloom over many a Republis in this sity this morning. It was feared prespect of rain would keep at home it sands who were expected to take pay proceedings here in honor of Lincoln Republican cause; but the doubters properly estimated the glorious enthusists essential devotion which apimaté the of the rural districts. These were never compienously displayed than in thehere, in the face of the most discourage emissiances. About 11 o'clock the people of the rural districts the people of the rural districts. here, in the face of the most discourse cumstances. About 11 o'clock the people to arrive—at first aquads of horsemen a tackments of wagons from the immedi sinity, and, later, the processions from rounding towns. These vasces were una that from Lockport taking the processions from the from Lockport taking the precede point of numbers, of all others, though no disparagement of Plainfield, Rickory Channahon, and other localities, which out their hundreds and thousands. The was soon full, and as the processions at the subarbs and marched into the towa, two hundred horsemen at the head of and a half of warons, profusely decursions.

"LINCOLN, LOVEJOY AND LIBRIUM from three brass bands, the cheers of the who filled the streets, and the cheers thousands in the procession, lit up or publican face with smiles of content. I that most of Old Will was sound to the max non-of own was sound to that whatever the boasting and gaseoms comy in the towns, the people would a that, is this fight, no injustice should to the candidates who so nobly upheld publican cause! Hurrah for Will and i lant yeomanry i

After the procession had filed thrust principal streets, exciting the wonder awaring propensities of the Denglas as pers, it was led to the stand which he exceed in the north-west pert of the city the speakers were to hold forth. Abdims the rain, which had all the moraing med to put a stop to farther proceedings to fall; but with real not ablt damp the shower, the horsemen in the proceedings to fall; but with real not ablt damp the shower, the horsemen in the proceedings to fall; but with real not ablt damp the shower made a gallant and beautiful dates a shower made a gallant and beautiful dates a lower made a gallant and beautiful dates a lower made a gallant and beautiful dates a lower the speaking on the ground so it was thought best to seek such sheller a be found, and conclude the demonstrathy bear could, within doors.
